## **MESSAGE OF THE PRESIDENT OF ADMINISTRATIVE BOARD**

Dear students and collaborators,

Danubius University of Galați is an institution that promotes high quality education striving to meet international standards and aiming to train professionals in various fields of study.

We were encouraged by our achievements to continue to forge ahead as a major University in Europe. We continue to make steady progress toward our vision to become an impressive international institution - a dream that we have had since the establishment of the University.

A dynamic and flexible institution like Danubius University can be seen, strong and stable in a world of continuing shifting sand.

Today we are proud of the initiative and participation in clusters on pressing development issues, such as Green Energy, Health, Shipping, Creative Industries, but also IT, a crucial field nowadays.

The students we have graduated and cultivated next to us, but also those who have learned to know and appreciate us, are, together with their skills and experience, the most important value of this institution. The plans we can carry out, the broadening of horizons, the bridges we can build between nations, and the flexibility we can train for endurance are our strengths.

It is in our power to maintain and raise the academic standards to which we have been active so far in order to become new models for others.

Harmony comes from well-being. Well-being is achieved through professionalism. Professionalism is built through education. Our aspiration is clear: to continue to believe in education, to believe in civilization, in science and culture in the face of prejudice and hatred.

Your decision to attend our university will mean much more than earning a degree. I am certain that, by educating you, Danubius University will become a better place and a stronger university.

Finally, I invite you all to visit our campus and interact with our websites to get to know us better. We are looking forward to welcoming you to Danubius University of Galați and finding ways to grow together!

President of the Administrative Board,  
Associate Professor Andy Pușcă, PhD.  
[rectorat@univ-danubius.ro](mailto:rectorat@univ-danubius.ro)

## RECTOR'S MESSAGE

I am delighted to welcome our new and returning students to the 2023-24 Academic Year. To our new students, welcome to the Danubius Family. We appreciate your decision to obtain your education from Danubius University and we recognize the importance of your trust in the University. It is my hope as your Rector that the University will not only meet your expectations but surpass them. Danubius University is relatively a young university, just a little over 30 years old. In spite of our age, we have already recorded exemplary accomplishments, which include our 24 144 proud graduates who are making a difference at their places of work and in their communities. It is our hope that you will be successful at Danubius University so you can join our distinguished proud alumni group.

As a relatively small institution, Danubius University offers several advantages that large institutions do not have. It is easy to get lost in the sea of people where students are just a number—universities that know you as a student but not as a person. Danubius University is different. We are small enough for faculty, staff, and even senior administrators to know you personally as you interact with them. But we are large enough for you to experience diversity, not only regional diversity but also international diversity.

A good university provides many opportunities, some of which are life transforming. These opportunities include meeting different people from across the globe, learning new things and growing intellectually, and providing ways for you to contribute your talents to advance others. While a university offers many benefits and opportunities to students, what you get out of a university depends, to some extent, on what you put in it. Those who put in the time to study, reap the outcome. Those who put in the time to form friendships, develop a network of professionals. Those who seize the opportunity to travel abroad as part of their study, form global perspectives. Therefore, I encourage you not to limit your education to the classroom activities, but to take full advantage of all that the university has to offer.

Danubius University, under my Administration as a Rector, aspires to become a comprehensive, international institution that draws men and women from all corners of the world, starting from Romania of course. Our goal is to attract faculty and students who wish to become global scholars and leaders, while remaining locally relevant and productive. We wish to be known as an institution of excellence—where research expands the boundaries between the known and the unknown, where teaching transforms the mind and the heart, and where our graduates are prepared to embrace their calling and commitment to humanity.

Our doors are open to receive, our hearts are eager to embrace, and our arms are spread out to welcome everyone who seek knowledge and growth from a supportive, caring, and committed academic community.

Veniți alături de noi!

Dr. Steve O. Michael  
Professor, Rector & CEO of Danubius University  
[rectorat@univ-danubius.ro](mailto:rectorat@univ-danubius.ro)

"Danubius" University in Galati is a modern, dynamic and entrepreneurial European institution adapted to contemporary society. Danubius University promotes knowledge and innovation by offering a unique experience of learning, research and development, regardless of age, experience, level of knowledge or form of training of students.

Danubius University was founded in 1992 by Prof. univ. dr. Benone Pusca. It was certified in 2008 as a research-development institution and was placed 5th in Romania among the universities certified as research-development units, according to the ANCS decision of July 2008. All these were prerequisites for the prestige of our institution to increase from one year to the next, proof that since 2005 "Danubius" grants the title of "DOCTOR HONORIS CAUSA".

Based on the "non-profit" principle, the "Danubius" University in Galati operates in accordance with the Constitution and the laws governing Romanian higher education, proposing to train specialists at the level of contemporary knowledge and performance, to promote forms and methods of education in line with the progress of today's society, but also with human rights and freedoms.

Currently, the student campus consists of 3 buildings. The University Faculties provide, as facilities, courses of subject holders, library services with approximately 43,000 volumes and over 2,000 periodicals, computer laboratories, legal and economic clinic, forensics, lecture halls, amphitheatres, as well as Internet connection, which can be accessed by all students and teachers.

**DANUBIUS UNIVERSITY PROMOTES  
KNOWLEDGE AND INNOVATION**

## THE SPEECH OF THE DEAN OF THE FACULTY OF LAW

Welcome to the Faculty of Law of the "Danubius" University!

A faculty guided by its vision of becoming an internationally recognized leader in the field of higher legal education.

We undertake the mission of preparing future generations of lawyers in a learning and training environment anchored to the reality and dynamics of the labor market, open to the challenges of new legal professions, a permanent environment connected to modern education methods and new technologies.

**THE PROFESSOR OF THE FACULTY OF LAW** is both a practitioner, well versed in the techniques specific to legal professions, and a theoretician, a researcher dedicated to the field of Law. Most importantly, the professor of this faculty is a good pedagogue and teacher, qualities that are quantified by certain indicators that prove their existence: the attractiveness of the course through the large number of students actively present; motivating/inspiring students to get involved in various scientific activities that stimulate debate (round tables, symposia, conferences, mock trial competitions, etc.).

In the teaching process specific to the Faculty of Law, we take into account the fact that **OUR STUDENTS** are different and practice or will practice in different fields that have legal training as a common denominator.

Adapting to the profile of the digital generation, the Faculty of Law permanently and responsibly assumes the role of reconfiguring teaching-learning activities, with new technologies becoming the main work tools in class and seminar classes. Online communication, online courses, online working groups, virtual applications, etc. they replace or complement most of the classical teaching-learning methods.

The numerous partnerships concluded by the Faculty of Law and law, notary, and mediation offices, as well as with public institutions, offer students the opportunity to complete internships in various fields specific to the legal profession, discovering the right career early on. The involvement, presence and expertise of **OUR GRADUATES** in the life of the Faculty of Law are particularly important aspects that the managerial strategy of this faculty takes into account. Our graduates reflect the professionalism of the teaching staff of this Faculty and convey the message of our credibility to the community.

The role of the Faculty of Law is not limited to teaching and research activities. We consider it particularly important to establish partnerships with the **BUSINESS ENVIRONMENT**, thus facilitating our students' access to entrepreneurial experience and the opportunity to develop and implement possible business ideas in close connection with specialized training in the legal field.

So, welcome to the Faculty of Law, a prestigious school where transparency, competitiveness, equity, collegiality, effective communication, partnership and balance unite us!

Success!

Dean,  
Associate Professor Ana Alina IONESCU DUMITRACHE, PhD

# **THE SPEECH OF THE DEAN OF THE SCHOOL OF ECONOMIC SCIENCES AND BUSINESS ADMINISTRATION**

The Faculty of Economic Sciences and Business Administration (FSEAA) has been accredited since 2004, undertaking the mission of training specialists, researchers and leaders in the bachelor and master's fields of Business Administration, Finance and Accounting.

Currently, the Faculty of Economic Sciences and Business Administration manages the following undergraduate programs:

Finance field, study program: Finance and Banks (IF form of education);

Business Administration field, study program: Economy of trade, tourism and services (IF and ID forms of education);

Accounting field, study program: Accounting and management informatics (IF and FR forms of education).

All degree programs are accredited.

Added to these are the accredited Public and Private Financial Management and Fintech master's degree programs in the field of Finance and Audit and Public and Private Control in the field of Accounting.

The key elements governing the management strategy of the Faculty of Economic Sciences and Business Administration are: performance, transparency, team, communication, legality.

The management strategy of the Faculty of Economic Sciences and Business Administration is correlated with both the external and the internal environment and has as its main mission – the integration of bachelor and master study programs, research activity and human resources of the faculty within general of the university and the economic and social environment.

The didactic mission is student-oriented and is carried out starting from the learning needs of young people, but at the same time, following the latest scientific contributions in the fields in which the study programs are found. FSEAA has a quality management, namely a set of structures, rules and measures aimed at guaranteeing the quality of the education process.

The Romanian legislative framework in the field of higher education imposes a series of principles in accordance with the EU strategy, emphasizing the term performance, at didactic and scientific level. At the same time, the current aspects of economic and social life generate, at the functional and organizational level, major changes in the education system, changes perceived differently in the academic environment, by students and teachers.

The Faculty of Economic Sciences and Business Administration is concerned with the association between the requirements of employers and the skills acquired by graduates of the faculty, in the context of European and national strategies aimed at the development of skills-based education. All the programs of the faculty have concluded collaborative partnerships with the business environment and public institutions for the performance of practice activities, joint participation in scientific events, etc.

The faculty proposes the continuation and development of international collaborations in order to improve curricular programs, the didactic and scientific process, promote the exchange of students and teachers through the ERASMUS+ mobility program, co-finance scientific research actions and ensure the provision of the material base.

# THE SPEECH OF THE DEAN OF THE SCHOOL OF COMMUNICATION AND INTERNATIONAL RELATIONS

In the 31st year of existence, the Danubius University's Faculty of Communication and International Relations is considered young and strong, with a dynamic spirit, heavily involved in the life of the Galati community - a young but mature faculty that puts the needs of the local community at the base of its development strategy, but is open to signals from the regional, national, and international environment.

The Faculty of Communication and International Relations has confidence in the future of the city of Galati and the region. For this, there are study programs that students really need. It has a mission that it holds sacred - namely to bring knowledge and to passionately support students' educational paths for the good and future of the community and the nation, for a successful journey in a competitive and dynamic environment.

The choice made by future students is a challenge for them, but for us, it represents an even greater challenge - that of conceiving and creating study programs that, besides an increase in analytical capacities and an expansion of knowledge, also bring an increase in professional expertise and acquired skills. As the Dean of the Faculty of Communication and International Relations, together with our entire team, I invite you to be part of our story and to discover the beauty of knowledge and learning, the light of culture - along with participating in exciting research processes and projects, shaping a future together.

Associate Professor Liviu-Mihail Marinescu, P.h.D.

## **THE SPEECH OF THE DEAN OF THE SCHOOL OF BEHAVIORAL AND APPLIED SCIENCES**

Today, in a dynamic but unpredictable world specific to the 21st century, the community of students and teachers remains almost the only certainty of a prosperous, ethical and functional future.

The Danubius University of Galati defines, among these parameters, its vision of the future in the medium and long term, participating directly, through the didactic and research process, in its construction. The profile of our university, both through its functionality - internationalization, openness to innovation, with a pronounced entrepreneurial profile, bent towards education and solid training - and through the performances achieved over time (approximately 20,000 graduates) articulates the objectives of its mission. Moreover, through its policies, the university has connected major didactic and scientific communities around the world with the support of the people who give it life: students, professors, researchers, support services staff and through the enthusiastic contribution of its graduates who occupy important statuses in Romania or in outside of it.

The Faculty of Law can provide you with all the instruments by which the social order is established and maintained so that the common good and the equity of all members of the city are guaranteed. In the Faculty of Economic Sciences and Business Administration you will find a collaborative and stimulating university environment, adaptive and sustainable, oriented to the needs of stakeholders.

Within the "Danubius" University, the Faculty of Communication and International Relations has assumed the mission of training specialists, researchers and leaders in different fields, from the East and South-East of the country, getting involved in the debates and projects of the society, in shaping a new development framework in the European context.

Moreover, the Faculty of Behavioral and Applied Sciences is the newest of the basic components of this construction. The professional and transversal skills acquired in its undergraduate programs (Psychology, Social Work and Informatics) will facilitate the fulfillment of professional tasks according to the specific deontological principles in the exercise of the profession, the application of effective work techniques in multidisciplinary teams at various hierarchical levels, the self-assessment of continuous training needs in order to adapt professional skills to the dynamics of the social context.

The Informatics undergraduate study program closely follows the vision and mission assumed by our university for the benefit of its students.

The non-university tertiary college Danubius concentrates its resources to ensure an attractive educational force, which combines the options of the students with the professional training needs of the local community, educating them in the spirit of the democratic principles of the open society.

In accordance with Romanian legislation, the Department for Teaching Staff Training is a structure of Danubius University authorized to offer psycho-pedagogical training programs for the exercise of the teaching profession, both for university students and for holders of bachelor's or master's degrees in the university's specific fields. The department also offers continuous training programs (Development of professional skills in the field of special education), professional conversion for pre-university teachers or postgraduate training and continuous professional development programs (Educational Management, Digital Teaching in the Virtual Classroom).

In essence, this is Danubius University in Galati. It is a complex, innovative and future-oriented higher education institution. We invite you to get involved in this endeavor that aims at your future in the short, medium and long term, but also the future of the region located at the confluence of the three waters: the Danube, the Prut and the Siret.

Vice-rector for Didactic Activity,

## THE DEPARTMENT FOR THE TRAINING OF TEACHING PERSONNEL

The Department for the Training of Teaching Personnel (DPPD) is a specialized department with a psycho-pedagogical profile qualified to offer psycho-pedagogical training programs to exercise the teaching profession in pre-university and university education.

The psychopedagogical and didactic training is carried out by the educational plans established at the national level, by order of the minister, and is structured on two levels:

- **The psycho-pedagogical training program level I (initial)** can be followed during the undergraduate studies, but only starting from the first year of a faculty within the Danubius University, in the specialization to which he was admitted.
- Danubius University educates **postgraduates, for the level I (initial) psycho-pedagogical training module**, only graduates of university degree programs with specializations existing at our university or compatible with them: Economics of Tourism Trade and Services, Finance and Banks, Accounting and Management Informatics, Informatics, Law, Communication and Public Relations, International Relations and European Studies, Psychology, Social Work.
- **The level II (in-depth) psycho-pedagogical training program** can be followed during the master's studies, but only starting from the first year, in the program/specialization to which he was admitted and if he had a certificate of completion of the level I (initial) psycho-pedagogical module and are graduates of undergraduate studies in a major/graduate study program in the same field as the field of the master's program in which they are a student.
- Also, DPPD educates **postgraduates for the level II (in-depth) psycho-pedagogical training module**, graduates who have a certificate of completion of the level I (initial) module, who are graduates of bachelor's and master's studies, both in the same field and existing/accredited within our institution, i.e. from the fields of Law, Finance, Business Administration, Accounting, Communication Sciences, International Relations and European Studies, Psychology, Computer Science, Social Work or interdisciplinary if applicable, among them.

Information about the registration fee and the admission calendar can be found on the DPPD website: <https://www.univ-danubius.ro/dppd/programe-de-formare-psihipedagogica>

DPPD organizes postgraduate programs for professional conversion, continuous training and career development, about which you will find information on the DPPD website: [//www.univ-danubius.ro/dppd](https://www.univ-danubius.ro/dppd)

Director,  
Senior Lecturer Doinita Popa, PhD

# DANUBIUS COLLEGE

DANUBIUS non-university tertiary College is a school that operates under the umbrella of Danubius University, already appreciated by students, parents and the local community for:

- the efficiency of the instructive - educational activity;
- ensuring equal opportunities for education for all students;
- the material basis necessary for a quality education.

High school graduates with and without a baccalaureate diploma are admitted to study. The non-university tertiary College DANUBIUS offers educational services in two fields of training, for three qualifications.

The fields of training are:

Media Production Field

**CAMERAMAN PHOTOREPORTER qualification, ISCED level 5**

The graduate of the Cameraman Photoreporter qualification will be able to:

- Use professional and broadcast cameras, both on set and in the field, in recorded or live productions
- Know the techniques and technologies that are necessary for creating TV productions
- Possesses the necessary qualities for teamwork and assuming responsibilities in the activity: Direction – Image – Scenography

Graduates of Cameraman Photoreporter qualification will be able to work, according to the Romanian occupation classification code, as IT and communications technicians; telecommunications, broadcasting and television technicians; photojournalists; journalists.

The practical courses are held in the TV studio of Danubius University, and the teachers are practitioners, specialists in the field of media.

Duration of studies: 2 years

Informatics Field

**ANALYST PROGRAMMER qualification, ISCED level 5**

The graduate of the Programmer Analyst qualification will be able to:  
Use information and communication technologies for the conception, design, development, testing, implementation and development of information systems, programs and related technical documentation.

Graduates of Analyst Programmer qualification will be able to work, according to the Romanian occupation classification code, as programmer analysts, information and communication technology specialists, computer science consultants.

Duration of studies: 1.5 years

## **LOCAL NETWORKS AND COMMUNICATIONS ADMINISTRATOR qualification, ISCED level 5**

The graduate of the Local Networks and Communications Administrator qualification will be able to:

- use computer network equipment;
- know and use network protocols and terminologies;
- know and apply local network (LAN) and global network (WAN) topologies, OSI (Open System Interconnection) reference models;
- to use cables, tools for structured cabling, routers, in accordance with the standards in force;
- install and configure network operating systems.

Graduates of Local Networks and Communications Administrator qualification will be able to work, according to the Romanian occupation classification code, as specialists in information and communication technology; database and network specialists; specialists in information and communication technology.

Duration of studies: 1.5 years

Practical courses are held in laboratories equipped with state-of-the-art equipment, and the teachers are practitioners, specialists in the IT field.

Specialized practice is provided both inside and outside the Danubius College, at specialized partner companies.

At the end of the years of study, students from all qualifications will take the professional skills certification exam to obtain the specialist diploma in the graduated field.

Diplomas obtained after completing the studies at the Danubius College are recognized throughout Europe.

At Danubius College we create specialists for the most sought-after jobs of the moment.

Director of Danubius College,  
Senior Lecturer Oana-Andreea Nae, PhD  
[oanaandreea.nae@univ-danubius.ro](mailto:oanaandreea.nae@univ-danubius.ro)

# STUDENT LEAGUE

Danubius Student League is a student association established within Danubius University of Galati, by students, for students. The Students' League is addressed to all Danubian students who pursue a development of their own potential through volunteering activities and through the numerous conducted projects and events.

LSUD is an apolitical and non-governmental association and brings together members from all Schools of Danubius University, regardless of their year of study.

LSUD supports the ideas of students challenging them to get involved in Danubian student life on a daily basis. Capitalizing the students' managerial skills is the main goal of "Danubius" Students League.

Other objectives are to create a student-entrepreneur network and business incubators for young students.

## OBJECTIVES

- Promoting the general and specific interests of its members in all fields of activity and developing specific programs in the field of information, training and education of students;
- Respecting human rights and protecting their freedoms;
- Supporting the increase of local responsibility in the social and environmental protection fields;
- Organizing exhibitions, presentations, introductory courses in language learning, projects, activities, events, conferences and seminars, round tables;
- Establishing a permanent dialogue with teachers;
- Informing students about the application of European legislation in the economic, financial-accounting, legal, business ethics, etc.;
- Association with other organizations with similar interests in the country and abroad;
- Organizing actions with a professional-scientific, cultural, sports, tourist or other specific activities;

STUDENT LEAGUE

“

As the President of the Student League of Danubius University I say that I am very proud to be part of this special group. On a daily basis, I put my passion into organizing as many cultural events, conferences and team building events that bring students closer and offer them valuable opportunities for personal development.

The courses and seminars offered by the teaching staff are of high quality, and this is very important in preparing students for the future.

Regarding my relationship with students I can say that I am here to be a support for them whenever they need, I can give them valuable advice on how to use the platform, how to organize their time for the exam session, I send them informational materials about the events to take place in the University, but also other topics that may interest them.

But what makes me feel that I have truly fulfilled my mission as Student League President is that I am one of those who care about the future and well-being of the students.

I invite you to join Danubius University and be part of the Student League!

President of the Danubius Student League,  
Gabriel Neagu

”

“

If I were to share certain aspects of why I chose this university, it would be because many friends recommended it to me. This helped me to discover that the choice I made was a good one, here I met understanding teachers with an excellent way of teaching, and what is most important is the fact that from any course/seminar you always leave with a learned lesson.

I chose Law, because you are more aware of your rights and responsibilities. In addition, you will be able to question certain regulations and absurd situations, as well as encourage those around you to fight for their rights. You will become much more involved and want to take a stand more often.

What I like most at this faculty is the team, the teachers who sometimes give you a second chance, but most of all the teaching in the hybrid system that offers many advantages to students who have a job, a family.

Mădălin-Ionuț Moise,  
student of the Faculty of Law,  
specialization Law, 3rd year, FTL

”

STUDENT

“

A determining element of success is chance. Psychology at Danubius was and remains the chance I chose to influence in favor of achieving my goal. I wanted to create a context of success and satisfaction for myself, and I was able to do this thanks to the opportunity given by Danubius.

Together with quality teachers and colleagues with potential, we have built an environment conducive to our growth and training.

Effort remained the key in my hand at this moment, success is one step away!

Thanks Danubius!

Cecilia Olteanu,  
student at the Faculty of Behavioral and Applied Sciences,  
specialization Psychology, 2nd year

”

STUDENT LIFE

### Why Danubius University?

Some things cannot be explained by words, but can be felt.

In life there is no good and bad or right and wrong, you always have many choices and they are good or right. I came here to gather as much information and knowledge as possible and I discovered a place that made me want more and more to evolve as a human being.

Within the Faculty of Communication and International Relations, numerous workshops, round tables and seminars are organized, together with teaching staff very well trained in the field and appropriate guests (specialists in the field), where you have the opportunity to find out things that will help you in the future in the professional career. It is an opportunity through which you can be more individualistic, independent, but also mature. The specialization combines a little bit of each branch of communication and creation.

I invite you to feel this wonderful experience on your skin!"

Mioara Șerban,  
student at the Faculty of Communication and International  
Relations, specialization Communication and Public Relations,  
2nd year, FTL

“

I'm glad I chose this faculty, because on the one hand it offers me many advantages over many other faculties, and on the other hand I love this field.

In the future I would like to have a role in the business industry, perhaps even running a company.

At the Faculty of Economic Sciences and Business Administration I met the best trained, understanding, open and friendly professors.

One of my favorite things is the possibility to study in a hybrid system, and about this I can say that Danubius has a platform that includes all the information related to the timetable (courses, seminars, laboratories), syllabus and events.

I look forward to you studying at the Danubius University in Galati!

Georgiana Căluian,  
student at School of Economic Sciences and Business  
Administration, specialization Accounting and Management  
Information Systems, 3rd year, FTL

”

“

I chose Danubius University because of its reputation and university professors.

The teachers are open and help you with any problem in different subjects and more.

The collective and the student-teacher relationship are of the highest quality, here I met people who helped me in my evolution and from whom I learned new things.

I chose the cameraman-photojournalist specialization because I wanted to learn and perfect myself in everything related to Media Production and especially because the university studio is up to date with everything related to professional equipment.

Join Danubius University and Danubius College you won't regret it!

Gabriel-Vlăduț Damian,  
student Danubius College,  
specialization Cameraman-Photojournalist, 2nd year

”

“

I chose this University because of the programs they have and successfully implement at the academic level for both students and teachers. The team is very united and always helps you with any concerns.

Informatics is the specialization I chose, because it helps you develop, first of all yourself and then the skills you will acquire during the 3 years. The IT field is one in continuous development and very much in demand, the jobs are very sought after and also very well remunerated.

The collective is an excellent one thanks to the very good communication with the didactic staff and the other colleagues I have, here I learned about the psycho-pedagogical module which I am very satisfied and ecstatic about, because through this module I will have the opportunity to share my knowledge with the students in the schools and high schools.

I'm waiting for you at the Faculty!

Denis Metehău,  
student at the Faculty of Behavioral and Applied  
Sciences, specialization Informatics, 1st year, FTL

”

## SCIENTIFIC RESEARCH

As a university and an innovative community, we must contribute to this effort to change the paradigm. We are the ones that, by direct effort but also through those that we train for the working life, participate in building a sustainable world. That is why scientific research must be understood as an essential element not only for the university or research institution where it is conducted. That is because this activity is outsourced by its purpose - which must relate to the real needs of society - and by its results - which are the answer of the scientific world to those identified needs.

At Danubius University, we propose a systemic approach to scientific issues in which all stakeholders have their place - from students to specialized institutions and local and national authorities. This approach ensures progress and success, not only in our organization but in the whole community. Danubius University is involved in national and international research, development, and innovation projects, with remarkable results, visible and valued in the academic (publications, reports, didactic dissemination), economic and social context (case studies, business counseling, sustainable development).

Research is the link between ideas and progress. It is a human endeavor that brings a plus of performance and comfort in a civilized society. It is the superior representation of curiosity and of testing it. In the modern world, scientific research activity is essential to communities who want to overcome their condition permanently. Progress is the essence of human civilization, and scientific research assures this progress. Increasingly, however, the focus is on keeping conditions and opportunities for progress from generation to generation (sustainable development). Therefore, scientific research is the one that needs to find the measure of all things and systematize the development priorities. Also, through scientific progress and the accumulation of knowledge, creative communities find a sustainable path, and they discover how to compromise between progress at any cost and sustainable and durable progress. The paradigm of the modern world has changed. We have all passed from "think big" to "think green", leaving no one behind. The paradigm of progress is continuously changing, and it reformulates itself daily. Under these circumstances, the shift from speed by a limitless effort to speed by calculating the minimum effort is a goal that scientists worldwide are working on continuously.

Professor Dr. Habil. Florian Nuță  
Vice-Rector for Scientific Research & Creative Scholarship  
floriann@univ-danubius.ro

## STUDENT AFFAIRS OFFICE

The Student Affairs Office provides support for the fulfillment of the educational mission of Danubius University. develops and implements the student activities plan in response to the University Strategic Plan to cover the following activities and departments: Career Counseling and Guidance Center, sports and recreation activities, cultural activities and orientation and guidance for newcomer students.

This department, through its activities, contributes to student satisfaction, and is concerned with creating positive experiences for Danubian students, so that they have a very good student life!

Scollaborates with all departments on campus to find the most suitable solutions in various situations that may arise during the study years.

The Student Services Department has the following duties:

- Supporting, ensuring and promoting the mission of Danubius University and a students;
- Ensures, in terms of student life, the requirements in accordance with the laws from Romania;
- Oversees the development of various activities and programs to enhance the involvement of students in the projects and activities intended for Danubian students, together with the President of the Student League;
- Works with deans and vice-chancellors to facilitate efficient communication between departments that contribute to ensuring the academic success of students;
- It is the voice of the students at meetings and events organized within the framework the campus;
- Works closely with the Enrollment Department to develop and implement initiatives to promote, recruit and retain Danubian students
- Promotes the Student League and facilitates the organization of events to them;
- Manage student fee and scholarship issues;
- As the student's advocate, the Department of Student Services intervenes on their behalf when necessary and implements disciplinary measures where necessary;

## EXPERIMENTAL PSYCHOLOGY LABORATORY

The Laboratory of Experimental Psychology is designed to carry out practical activities for students enrolled in Psychology within the School of Behavioral and Applied Sciences.

The "PSISELTEVA" psychological assessment system consists of:

- ROV fatigue and alertness test;
- Hand-eye coordination test TUD;
- Focused attention and TACS support test;
- RCMV hand-foot coordination test;
- Memorization - TIM learning test;
- ADV speed and distance evaluation test;
- Reaction time and TRSC complex stimuli test;
- PMOV horizontal motion perception test;
- Commutative and concentrated attention TACC Test;
- Database program;
- Accessories (large desk + USB interface, levers, pedal assembly, small desk);
- Laboratory.

## INFORMATICS AND PSYCHODIAGNOSIS LABORATORY

The Laboratory of Informatics and Psycho-diagnosis is for the practical and seminar activities of the students from the Psychology specialty, within the School of Behavioral and Applied Sciences. The trainees participate in practical activities aimed at initiating the following steps: investigating and psycho-diagnosis of the disorders, psychological evaluation of the mental health state for carrying out psychological examination activities, cognitive and neuropsychological assessment, behavioral evaluation, subjective-emotional evaluation.

The lab is equipped with:

- The MAB Manual;
- Online point for managing / scoring MAB;
- Verbal Skills Testing Book for MAB;
- Performance test kit for MAB;
- Response sheet for MAB;
- The DENVER Manual;
- Scoring manual form for DENVER;
- Instrumental testing for DENVER;
- PDQ Form for age category 0-9 months for DENVER;
- PDQ Form for age category 9-24 months for DENVER;
- PDQ Form for age category 2-4 years old for DENVER;
- PDQ Form for age category 4-6 years old for DENVER;
- NEOPIR / NEOFFI Manual;
- Online point for administration / scoring NEOPIR;
- Test Notebooks for NEOPIR;
- Response Sheet for NEOPIR;
- Manual Tree Test (K. KOCH);
- Rorschach psycho-diagnostic manual (Ewald Bohm);
- Set the Rorschach sheets;
- Set of Rorschach localization aids;
- General Manual of RAVEN Test Usage;
- Set SPM (Progressive Matrix Standard).

## THE FORENSIC LABORATORY

The Forensic Laboratory, the main attraction of future forensic experts, offers the opportunity to use state-of-the-art equipment to analyze the forensic investigation of the crime scene. The strength of this laboratory is the manikin made of a special material that allows students to carry out the investigation by successive maneuvers involving punching, cutting, snatching in order to determine the objects that lead to bodily injury.

Within this lab, future lawyers carry out practical activities alongside specialists from the Forensic Services. We exemplify in this sense the practical activity of investigating the crime, and in particular on-the-spot investigation, activity performed within the discipline of Forensics - Investigation Techniques and Procedures.

The Judicial Clinic Laboratory is a space set up as a courtroom where students are involved in simulated trials so as to deal with the diversity of issues raised by the complexity of a trial.

The Judicial Clinic Discipline is studied in the IVth year of studies and the general objective of this discipline is to prepare the students with thorough knowledge, at theoretical and especially practical level regarding the conduct of the criminal trial taking into account the procedure to be followed in front of the courts.

Whatever role they play in a simulated trial, students' participation in such a project can only show their legal knowledge level, accumulated over their years of study, to help them discover whether they are fit to plead or if they can do well in the robe of a judge or a prosecutor.

**CRIME SCENE DO NOT CROSS**

## MEDIA LABORATORY

Within MEDIA department there is a television studio equipped with modern equipment, acquired through the VEHMED (Media Vehicles for Practical Skills Training, Television and News conducted by Students for students) and M.E.D.I.I.A. (M.E.D.I.I.A - Educational Methods for the Development of Innovative Entrepreneurial Education) projects.

VEHMED is a project co-financed by the European Social Fund through the Sectoral Operational Program Human Resources Development 2007-2013, Priority Axis 2 – “Linking lifelong learning to the labor market”, Key area of intervention: 2.1 – “Transition from school to active life”, Reference number for the grant contract POSDRU 90 non- /2.1./S/64002 ([www.vehmed.ro](http://www.vehmed.ro)).

M.E.D.I.I.A. was a project based on the needs of innovation. Innovation and sustainability are the two principles on which the partnership has developed the project's specific objectives and activities. The need for innovation is, first of all, related to innovation as a necessity in the development of companies. To achieve this general objective, the partnership aims to:

- Revising its own educational offer and increasing the attractiveness and practical dimension of educational offers;
- Innovation in the approach to the labor market, supporting the creativity and entrepreneurial spirit of students, by creating a methodology and establishing an organization to support student start-up projects;
- Innovation in guidance and management of students for career development and access to the labor market.

Within this TV studio, the students of the Faculty of Communication and International Relations are conducting internships, together with Media specialists. Also through the Media studio there are created audiovisual materials (interviews, shows, presentation films, advertising spots, podcasts, live transmissions). All the students' materials are posted on the social media channels of Danubius University.

## BUSINESS & ADMINISTRATION

Danubius University has assumed the mission of being a bridge between its students and the business environment, the real world for which our study programs prepare them and provide them with that baggage of knowledge and educational and practical experiences that they will use in their future profession.

But, above all, Danubius University has an extremely important mission that it undertakes every day towards its students, master's students and partners - that of providing the most suitable environment to grow, both professionally, as well as morally, the best place to show their compassion and generosity, contributing to their well-being and that of colleagues and friends, creating communities based on shared values, such as innovation, truth, excellence, respect, responsibility.

I invite you to discover us, be part of our community and bring, together, the most valuable and innovative business ideas to the virtual laboratory, but also to the hub created here, especially for all those who want to develop and share values!

Vice-Rector for Innovation and Entrepreneurship,  
Associate Professor Eng. Alina Beatrice Răileanu, P.h.D.  
[alinarailanu@univ-danubius.ro](mailto:alinarailanu@univ-danubius.ro)

## FOREIGN AFFAIRS

The internationalization of higher education is a broad, complex and dynamic process. Danubius University supports its students' efforts to acquire those skills that will allow them access to a superior position on the labor market. The creation of a competitive climate among students, which takes into account the dynamism imposed by the current economic situation and the current global development trends brings with it a coherent response from them, which implies an increase in the demands from students to be part of this internationalization activities developed by Danubius University.

An international university is a university whose students have free access to higher education institutions in the international academic environment, access to international databases and publications, as well as to learning and training mobility experiences abroad.

Danubius University's partnerships with institutions of academic vocation in Europe and worldwide , international teachers exchanges, participation and involvement of students in the design and implementation of international conferences, participation in mobility activities for learning and internship are just some of the key elements that support this approach. Increased attention is paid to the Erasmus+ Program and its role in supporting the training of the modern European student.

At the same time, the university is involved in an extensive process of continuous training of the entire teaching staff, as well as of auxiliary and non-teaching staff. All these efforts support the idea of an international university recognized both locally, regionally and nationally, as well as internationally, which assumes the role of trainer of new generations of intellectuals in Romania and Southeast Europe.

Director Foreign Affairs Department,  
Associate Professor Emanuel-Ștefan MARINESCU, PhD  
[marinescuemanuel@univ-danubius.ro](mailto:marinescuemanuel@univ-danubius.ro)

## ERASMUS+

Erasmus + is the new European Union programme for education, training, youth and sport for the period 2014-2020 which aims to contribute to the development of skills and employability by providing opportunities to develop education, training youth or sports activities .

Erasmus + offers the opportunity to study, to train, and to gain professional experience through mobility projects. These mobility projects are institutional projects funded by Erasmus + that allow the implementation of activities involving partners from several countries (trans-national). Transnational partnerships between different organizations and institutions of education, training and youth aim to foster cooperation and to build bridges between the education system and the field of work in order to facilitate the coverage of the skills gap so needed nowadays.

More information: [https://ec.europa.eu/programmes/erasmus-plus/about\\_en](https://ec.europa.eu/programmes/erasmus-plus/about_en)

### **To whom is Erasmus + addressed**

Erasmus + mobility activities are addressed both to the final beneficiaries of the learning process and to professionals in the fields of education, training and youth who facilitate the learning process, as follows:

"Danubius" University students from the bachelor's and master's cycles;  
Teachers and non-teaching staff of Danubius University.

# THE CENTER FOR HERMENEUTICS “SYMBOLS AND TEXTS” (CHeST)

## 1. Justification. Vision and mission

The Center for Hermeneutics “Symbols and Texts” (CHeST), founded in 2020, justifies its existence and functioning within “Danubius” University of Galați since, on the one hand, (1) it meets some needs specific to the research and the didactic activity of our institution (from a methodological point of view) and, on the other hand, (2) it serves as a catalyzer for the scientific interests of some faculty members and researchers from our university (mainly in the field of humanities).

## 2. Areas of research

CHeST, by integrating some interested faculty members and researchers belonging to “Danubius” University of Galați, can focus on the following areas of research (which also correspond to the main branches of hermeneutics as such):

- philosophical hermeneutics;
- legal hermeneutics;
- literary hermeneutics (as text linguistics);

Depending on other similar interests and in the case of integrating in CHeST other specialists (even from other universities, as well), the research can also be oriented to:

- biblical (theological) hermeneutics;
- hermeneutics of sciences (including natural sciences).

In addition, the results of our research can be applied or put into practice, in order to meet the needs of the (extended) community that our university is part of.

## 3. General objectives

- elaborating individual or collective studies regarding important aspects of human understanding;
- establishing national and international partnerships on current hermeneutical topics of interest;
- increasing the visibility of CHeST (and, implicitly, of “Danubius” University of Galați) by active involvement of the members of this center in the discussions concerning the significant matters of this field;
- obtaining financial support (or grants) from external sources for our research projects;
- informing the academic Danubian members about the novelties from the field of hermeneutics;

- ensuring specialized support (as regards various interpretive matters) to institutions, companies, schools etc., for training employees etc.;
- acquiring and developing the competences for understanding texts and problematic situations by students and (if necessary) Ph.D. students / candidates;
- describing the features of functional styles and specialized languages (with a special focus on legal discourse, political discourse, economic discourse, journalistic discourse and advertising discourse);
- studying and teaching techniques of adequate and efficient (written and oral) communication necessary in various situations / contexts, for those interested in improving their own communication skills (through courses on academic writing, public speaking, debate) etc.

#### 4. Specific activities

- applied research: periodic meetings, debates, round tables, lectures, training courses, workshops etc.
- the yearly international conference „Symbols, Texts and Integral Hermeneutics” (STIH), organized by CHeST;
- the publication of relevant articles / studies in specialized journals (including Acta Universitatis Danubius: Communicatio, Juridica etc.);
- research activities within current or future possible scientific projects.

CHeST Director,  
Professor Cristinel MUNTEANU, PhD  
[cristinel.munteanu@univ-danubius.ro](mailto:cristinel.munteanu@univ-danubius.ro)

## DANUBIAN STUDIES AND RESEARCH CENTER

The Danubius Studies and Research Center (CSCD), since its foundation in 2008, has wanted to represent a motor of the Danubius University, for carrying out scientific research, development and innovation activities in multi-, inter- and transdisciplinary.

CSCD capitalizes on the advantage of being located on the EU border, promoting collaboration and research policies with universities and other entities in the cross-border area. In this approach, the "Danube - Axis of European Identity" conference is a scientific event that brings together numerous researchers from the country and abroad every year. However, in recent years we have managed to diversify contacts, on the occasion of various events, by attracting partners and collaborators who go beyond this space.

Having a dynamic and valuable team, we have in mind: Initiating research groups for the purpose of submitting projects and attracting financial resources in collaboration with researchers who are part of the Center's team, publishing some volumes of studies and Involvement of a large number of students in the center's activities; the participation of the master's students in the scientific events organized within the collectives of authors led by professors of the university and the publication of their works; collaboration with the other centers of the university, Symposiums, Round Tables, Workshops depending on the political, historical and economic events taking place, participation in scientific conferences, supporting the scientific activities carried out by the Danubius University and its external partners, or concluding partnerships with various bodies and institutions, book launches, etc.

Through sustained efforts, we managed to involve, each time, a reasonable number of students in the events held through CSCD, something that makes us especially happy.

We invite you to join us to get to know us better and to develop mutually beneficial partnerships between Danubius University and your institution!

Director CSCD,  
Senior Lecturer Ștefan GHEORGHE, PhD  
[stefangheorghe@univ-danubius.ro](mailto:stefangheorghe@univ-danubius.ro)

## **RESEARCH CENTER ON SOCIO-ECONOMIC DYNAMICS IN SUSTAINABLE DEVELOPMENT**

Being a continuation of the Multidisciplinary Research Center, established in 2001, the Research Center on Socio-Economic Dynamics in Sustainable Development (CC-DISEDD) was created in 2008, in order to contribute, support, develop and promote: Research Fundamental and applied scientific, innovation, transfer of knowledge, development of human resources involved in research and enhancing research. In a knowledge-based society, characterized by four verbs of action (to generate, to transmit, to broadcast and to use), the Center for Research on Socio-economic dynamics in sustainable development implies the development of a new organizational culture based on reality and in particular the generation of surplus values.

Sustainable development results in the establishment of a new development paradigm through the confluence of economic, social and environmental factors. Science must be viewed as an essential component in the process of restructuring the society and the economy to ensure sustainable development. The objectives for sustainable development (ODD) recognize that the eradication of pauperity is the key to strategies that build economic development. Eradication of pauperity and economic and social development are essential for sustainable development. Increased access to productive resources and the existence of effective public institutions are the most important in the fight against pauperity. Public and private investments in education, health and social programs are indispensable, to give the poor the means of integration in the market economy and to contribute to an economic development for the benefit of all.

In the Universal Declaration of Human Rights it was stated: "Everyone has the right to a decent level of life, able to ensure his health, his well-being and his family, especially food, clothing, house, as well as the necessary social services." However, these rights remain virtual for many inhabitants of the planet. In the last 10 years, 1% of the world's population has captured more than half of the new global richness (according to the Survival report The Richest published by Oxfam, 2022), why it has been installed and what is the way of eradication are essential questions, for which we should seek and find answers, formulate and apply effective and close strategies to the socio-economic development characteristic of each country. We must resort to collecting all data useful to understand the cultural, social, economic, political and institutional realities that

determine the opportunities and obstacles encountered by the poor I, in their efforts to escape from the "trap of pauperity". ODD addresses a palette of social needs that include education, health, social protection and opportunities for places work, while treating climatic changes and environmental protection. Looking at the prism of a challenge, but also a real development opportunity, CC-DISEDD focuses on coagulating national and international research efforts on the influence of legislative and economic stability in social life, as well as the influence of economic, social and legislative factors on sustainable development, by orienting the entire educational process, of scientific research and innovation towards this requirement.

In order to explore the concepts, strategies, sustainable development indicators, social responsibility, to develop interest, skills and education in this field CC-DISEDD intensifies the stimulation of the potential and capacity of research groups in the university environment-teachers, students and masters. , as well as the institutional and private environment, by: connecting them to priority research programs at national and international level; dissemination of research results by participating in internal and international scientific events, in order to make their own research areas and results; materializing the results of the research by publishing them in prestigious publishers in the country and abroad; Developing and diversifying collaborations with other similar research centers or educational institutions in the country and abroad.

The Center for Research on Socio-economic dynamics in sustainable development is involved in strategic partnerships with the regional economic environment, being invited as a credible partner and expert in the debates for the Sustainable Development Council of the Galati Council and of the Southeast Regional Development Agency. CC-DISEDD pays special attention to the projects aimed at the sustainable development of the Danube region. In this regard, he responded to all the invitations addressed by the local, national and international public authorities, the non -governmental organizations to participate in the elaboration and implementation of such projects. At the request of the Local Council in Galați, a series of local partnership proposals were elaborated.

Senior Lecturer Luminita Maria Filip Crăciun, P.h.D.  
Director CC - DiSEDD (Research Center on Socio-Economic Dynamics in Sustainable Development)  
mariacraciun@univ-danubius.ro

## LIFELONG LEARNING AND TECHNOLOGICAL INFORMATION CENTER

LIFELONG LEARNING AND TECHNOLOGICAL INFORMATION CENTER is the unit within Danubius University, which ensures the production, transmission, and valorization of knowledge in various specialized fields, its primary role being the identification and organization of short-term continuous training activities, both formally and informally.

Both formal and informal training programs are supported by certified trainers, specialists, and practitioners with relevant experience in the course areas.

AUTHORIZED TRAINING PROGRAMS, registered in the National Register of Professional Training Providers for Adults, carried out by the Continuing Education Center are the following:

- Public procurement expert;
- Project manager;
- Entrepreneurial skills;
- Responsible for the protection of personal data;

Information Security Manager in collaboration with the National Institute for Research and Development in Informatics - ICI Bucharest.

Participants are awarded graduation certificates recognized by the Ministry of Labor and Social Protection and the Ministry of Education after the evaluation. FOREIGN LANGUAGE COURSES - **ENGLISH, ITALIAN, SPANISH, ROMANIAN, FRENCH** - are carried out to acquire an available language (for Linguistic Competence or International Certificates), but also on request for specialized language: business, financial-banking, academic, technical, legal, administrative, medical, touristic, journalistic. The courses are completed with the issuance of a certificate of participation issued by the Danubius University in Galati or with the passing of an exam to obtain a certificate of linguistic competence - level A1/A2, B1/B2, C1/C2 issued by ECL (European Consortium for the Certificate of Attainment in Modern Languages) - which can be used for Ph.D. enrollment, employment, professional promotion, scholarship etc.

NONFORMAL COURSES FOR INITIATING AND IMPROVING SKILLS IN DIFFERENT AREAS:

**TRAINING TO USE THE SAGA PROGRAM** - is the most used accounting program. Through this course, you can learn how to apply accounting knowledge with the help of an accounting - stock management program. This course is aimed at beginner and intermediate user categories.

**SOCIAL MEDIA ACCOUNT MANAGER** - social media is increasingly present in our activity. Through this course, you can improve your knowledge of developing strategies, creating content on social media, and building websites or paid advertising.

Director of Lifelong Learning and Technological Information Center  
Andra Marcu, PhD  
andramarcu@univ-danubius.ro

## ENROLLMENT

As your academic journey begins, I encourage you to approach your studies with an open mind and a willingness to explore new ideas and perspectives. Take advantage of the resources available to you, such as professors, mentors, and peer advisors, to enjoy your classes and get the most out of your time on campus at the same time.

In addition to academic activities, I also encourage you to get involved in extracurricular activities and projects that align with your interests and passions. These experiences will not only help you build valuable skills and connections, but also give you a sense of community.

Finally, I want to remind you that university can be challenging, both academically and personally. Don't be afraid to seek support when you need it, whether it's from teachers, peers or university resources. Remember that you are not alone and that there is always help available if you need it.

Enjoy your time at Danubius University and make the most of every opportunity that comes your way!

Senior Lecturer Sergiu-Lucian Șorcaru, Ph. D.  
Director of Enrollment Department  
[enrollment@univ-danubius.ro](mailto:enrollment@univ-danubius.ro)

## APPLICATION FILE

The application file will include the following documents:

- a) The request for issuing the letter of acceptance to study, according to the Methodology for offering of studies and training to foreign citizens in EU third countries in public and private education accredited in Romania, completed at all fields in duplicate;
- b) The Baccalaureate diploma or its equivalent– copy and legally certified translation;
- c) The studies document – copy and legally certified translation – which allows the access of the candidate to the respective education program (bachelor's degree diploma or its equivalent);
- d) Academic records– copy and legally certified translation – for the completed studies;
- e) Birth certificate– copy and legally certified translation;
- f) Copy of the passport – valid at least 6 months after the date when the letter of acceptance to studies is issued;
- g) Medical certificate (in a widespread international language) to prove that the person to be registered for studies does not suffer from infectious diseases or other illnesses that are incompatible with the future profession;
- h) Papers certifying the name change, copy and authorized translation (ex. Marriage certificate, etc.);

The candidates will send the files directly to the chosen accredited high education institutions. The high education institutions will analyze the files and send to the Ministry of National Education – General Department for International Relations, a list of persons that are nominated to receive the Letter of Acceptance to Studies. Along with the list, the high education institutions must send a copy of the applications for issuing the Letter of Acceptance to Studies that were filled in by the candidates.

When registering, the candidates will present the documents from the Application file, in original, certified for authentication by the Embassy of Romania to the issuer country or endorsed with the Hague apostille, if the previous studies were not completed in Romania, in a European Union country or in accordance with the legal assistance agreements signed between Romania and third countries. The admission session runs in July and September. Please visit our website to find information about fees <http://admitere.univ-danubius.ro/en/inscriere/taxe>

For any other further information, please contact us at [enrollment@univ-danubius.ro](mailto:enrollment@univ-danubius.ro)

## THE LIBRARY

The library of the Danubius University, a fundamental part of the academic offer, satisfies the need for knowledge and professional training of future specialists of the national and European economy through its equipment and environment. With a collection of more than 45,000 volumes consisting of books, collections of scientific journals, heritage books, the library is a valuable adjunct for future specialists in legal sciences, economics, international relations, administration and communication, including teachers find their source here main up-to-date scientific information.

The library's offer is not limited only to the profiles of existing specializations, the purchase of books and publications aiming at an encyclopedic approach. Dictionaries, encyclopedias, histories and other general works are made available to members of the academic community precisely to avoid a formative act limited to the field of study. The opening of the formative act to the fields related to the disciplines and to the general culture better highlights the personality of the specialist, whether he is a student or a teaching staff. The 8 hours of daily program are an essential part of the formative act in the academic offer. Based on the "non-profit" principle, the "Danubius" University in Galati operates in accordance with the Constitution and the laws governing Romanian higher education, proposing to train specialists at the level of contemporary knowledge and performance, to promote forms and methods of education in accordance with the progress of the current human society, but also with human rights and freedoms.

A stack of several books is positioned on the left side of the image, resting on a white, polished marble surface. The books have varying thicknesses and colors, with some showing their spines and others their pages. The background is a solid, light beige color.

Modernity has imposed an organization of the book fund with particular emphasis on the latest acquisitions in each field of the sciences studied through the curricular approach. The offer does not lack the books of Danubius professors, the courses related to the subjects studied, the reference titles in each field, including an old book collection from donations, all accessible through the online computer system, so that no question remains unanswered, when a reader crosses the threshold of our library.

The library also offers access to Romanian and foreign databases. Through the Sintact and Indaco legislative databases Archived December 22, 2021, at the Wayback Machine., library users are connected to the latest legislative changes, jurisprudence and doctrine. It also offers access to 14 online journals in the fields of law and economics.

The Anelis Plus membership agreement of 2012, still in force, is of inestimable benefit to the library and the entire university. Through access to foreign databases, ProQuest Central and Cambridge Journals, the library has enriched its resources with more than 22690 materials available online, periodicals, dissertations, newspapers, reports, documents, video clips from various fields, accessible on the basis of institutional ip . Of these, 7060 specialized journals of interest to the fields studied at our university were selected and listed. The resources are both in a foreign language, especially in English, and in Romanian. The online IT system (Tinread) offers the possibility of accessing information on library resources. When accessing the link, the Search option will change to Advanced Search, with the possibility of searching volumes according to title, author, subjects, year of publication, etc. After selecting a certain work, information such as title, author, publication details, ISBN, quota (by selecting the Professional option) and their availability in the library appear. At the same time, readers have the opportunity to enter into an online dialogue with librarians and receive additional information.

## PUBLISHING HOUSE

In an environment of performance and creativity, Danubius University Press carries out its daily activity of valuing scientific research by disseminating its results: the 12 specialized journals (Danubius Journals & Danubius Proceedings), published books, partnerships with prestigious publishers in the country and abroad, being working tools available to members of the Danubian academic community. Danubius University Press (EUD) focused on providing course materials, publishing Danubius University's journals, processing them to meet the most demanding publishing standards, collaborating with foreign authors in order to disseminate the university's publications and events.

EUD offers:

- a publishing contract;
- ISBN (international book identification code)
- access to the full text on the publisher's website (<https://eud.univ-danubius.ro/index.php/EUD>) without login or costs;
- the format of the manuscript is established with the author (B5 or A5);
- the possibility to correct before the completion of the book (the manuscript must have at least two scientific referees);
- the cover is achieved according to the title, theme and wishes of the author;
- printing lasts about 10 working days, after the approval of the final content, the online version will be available the next day (with the author's consent);
- promoting the manuscript on all social networks of Danubius University, on the official website of the University, on the website of the Publishing House (<https://eud.univ-danubius.ro/index.php/EUD>) and in the network of institutional partners of Danubius University.

## SPORTS FACILITY

The sports base of the Danubius University composed of multifunctional fields for volleyball, basketball, tennis and mini-football, made of molded polyurethane, with a nocturnal installation and an athletics track made of liquid tartan for the physical education of students, is the generous host of didactic activities and sports competitions that train faculty teams and an impressive number of supporters who encourage their colleagues from the stands. In the future, an Olympic hall, unique in Galați, will complete the endowment of the Danubius University, the institution trained not only in mass sports, but also in performance sports. Championships are regularly organized that train teams made up of university students, high school students and even professional athletes of the Galați Phoenix Club. A partnership was concluded with the latter, the club even accepting the name of Danubius, and their effective participation in university competitions already being a fait accompli. The Street Ball Grandtour Championship is an edifying example of this.

# CONFERENCES

## EIRP INTERNATIONAL CONFERENCE

The central theme of the EIRP series of events focuses on the EU integration. The participants, academics and researchers, meet yearly, during the second decade of May, in order to exchange information and to conceptually debate the EU integration, its effects on the European citizens, key statistical facts on major European policy areas, the European Union progress, etc. The purpose of the Annual International Conference on European Integration - Realities and Perspectives is to provide a forum for exchange of ideas, research outcomes, business case and technical achievements. The subjects of mutual interest debated during the previous editions of the EIRP Conference Series included, but were not limited to: government debt, world trade, environment, migration, information society, dependency on energy imports etc.

## THE DANUBE – AXIS OF EUROPEAN IDENTITY

The central theme of this series of events focuses on the Danubian scientific research. The participants, academics and researchers, meet yearly, on the International Danube Day (June 29), in order to exchange information and to conceptually debate the wide range of Danubian issues. The purpose of the Annual International Conference The Danube - Axis of European Identity is to provide a forum for exchange of ideas and research outcomes on themes such as: Danubian Economy, River Law, Europeism, Communication, Local Communities, Danubian History and Mentality.
